EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with John L Rogitz [Registration No. 33,549] on 01/19/2005.

The application has been amended as follows:

Claim 10 is amended as follows:

An electric apparatus constructed so that a battery pack for power supply can be attached to the system unit thereof, comprising:

a plurality of temperature detectors provided for a plurality of locations in said battery pack;

a measure selector for selecting the <u>respective</u> temperature rise suppressing measures of a specific stage from the temperature rise suppressing measures of a <u>plurality of stages</u>, according to each <u>respective</u> temperatures detected by <u>said plurality</u> of respective temperature detectors; and

wherein said measure selector determines stepwise temperature rise
suppressing measures of lower to higher levels according to the temperature condition
of each of the temperatures detected by said plurality of temperature detectors, and if
the temperature detected by at least one temperature detector of said plurality of

Application/Control Number: 10/015,812

Art Unit: 2115

higher than the temperature rise suppressing measure of the current stage, it selects
the temperature rise suppressing measure of said stage corresponding to said
temperature condition; and

Page 3

a suppressing measure implementing logic for implementing the temperature rise suppressing measure selected by said measure selector.

Claim 11 is cancelled.

Claim 12 is amended as follows:

The electric apparatus according to claim 41 10, wherein said measure selector selects any two or more of a measure for decreasing the clock frequency of the CPU in said system unit, a measure for intermittently operating said CPU, a suspend measure in the system unit, and a power-down measure as stepwise temperature rise suppressing measures.

Pursuant to MPEP 606.1, the title has been changed to read:

-- BATTERY HAVING A PLURALITY OF TEMPERATURE SENSORS FOR
OUTPUTTING DIFFERENT CONTROL INFORMATION TO A CONNECTED
COMPUTER SYSTEM BASED UPON THE TEMPERATURE RELATIONSHIPS OF
THE SENSORS --

Art Unit: 2115

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Nirav S Amin whose telephone number is (571) 272-3821. The examiner can normally be reached on 8:00-4:30.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Thomas Lee can be reached on (571) 272-3667. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
